Dear Sir or Madam,

I study for a Master's degree at Masaryk University in Artificial Intelligence and Data Processing. Up until recently I worked in a area of web applications however with each day my interest in working with data grows. I would like to gather more experience with data analysis and processing on real projects.

I am currently (March 2019) looking for a job considering working with data. However I prefer part-time because I'm still a student.

Thank you for considering my request.

Yours faithfully,

Dominik Gmiterko
